MCKINSEY

BY 2025, THE INTERNET OF THINGS WILL HAVE A TOTAL ECONOMIC IMPACT OF \$3.9 TRILLION TO \$11.1 TRILLION PER YEAR.

ASCENDON HOME

The proliferation of connected devices is driving explosive monetization opportunities for connected home providers. Give every family member the content they want, when they want it, on their device of choice:

- **Flexible catalogs** for multiple business models including selling of devices, renting of devices, selling of installation, monitoring & alerting, and capabilities to customize and personalize solution offerings for customers
- **Support a number of different device and pricing options** through nimble business models
- **B2B and B2B2C models** enable M2M and IoT opportunities within the connected home ecosystem

ASCENDON CAR

Automobile manufacturers and network owners are teaming up and deploying Wi-Fi capabilities providing more value to customers and partners (and new revenue streams) as a result. Streaming digital content, music and navigation services are just the beginning. Self-driving cars are the next frontier. Whatever the next generation of connected vehicles looks like,

Ascendon Car puts you in the driver's seat:

- **Enable business partners** to access the network and analyze customer behaviors to provide more personalized services—even offer reselling through a digital marketplace
- **Support a digital marketplace** for Wi-Fi and value added services directly with the consumer
- Deliver powerful new ways to **merchandise and cross-sell** to consumers

ASCENDON PLANE

Airline passengers are a significant, yet primarily untapped market. Airlines are working hard to differentiate themselves with Wi-Fi and connected experiences for passengers and employees:

Ascendon Plane monetizes Wi-Fi deployments, gives airlines and their network partners the tools to swiftly launch an entire marketplace accessible in the sky

- **Extend brand reach** to customers through Wi-Fi, opening up new market and revenue opportunities
- **Generate new revenue** by targeting consumers that expect seamless connectivity on the devices they bring into the plane ecosystem, while also improving customers' in-plane experience
